DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory M. Howison on July 8, 2005.

The application has been amended as follows:

Claim 1, line 10, delete "**the** associated condition" and insert - - an associated condition - -.

Claim 1, line 11, delete "**a** the" and insert - - the - -.

Claim 1, line 12, delete "**the** associated setpoint" and insert - - an associated setpoint - -.

Claim 1, line 18, delete "**the** suggested" and insert - - a suggested - -

Claim 2, line 2, delete "suggested actions" and insert - - suggested setpoints - -.

Claim 2, line 3, delete "to the operator suggested" and insert - - suggested to the operator - -.

Claim 3, line 3, delete "its" and insert - - the associated - -.

Claim 8, line 1, delete "plant" and insert - - system - -.

Allowable Subject Matter

2. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The allowability of the claims resides, at least in part, that the closest prior art of record **Lipner et al. (US 4,815,014)** does not disclose or suggest, alone or in combination the step of:

Regarding independent claim 1, **each of the transforms has embedded therein intuitive actions taken by actual operators of the system to provide setpoints for an associated condition, and wherein each of the transforms is operable to determine if the predetermined and associated condition exists in the system, which would warrant an associated setpoint being set; processing the measured select operating parameters through the associated transforms to determine for each of the transforms if the associated condition is present; and providing to the operator an indication that the condition associated with any of the transforms is present and for which transform; and suggesting to the operator the setpoint to be set for the associated indication and a suggested value thereof**, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
